Education

Ph.D., Economics, expected Summer 2019
University of Utah, Salt Lake City, UT
Dissertation: "Market Sentiment, Asset Prices, and the Macroeconomy"

B.S., Economics, *magna cum laude*
Minor in Accounting
University of Southern Maine, Portland, ME

Research Interests

Financial Macroeconomics, Monetary Theory

Research

Job Market Paper:
"Banking on bubbles: credit creation and the persistence of bull markets." I address the question of whether the banking system plays a role in perpetuating financial bubbles through the extension of credit used for speculation. When the financial system lends against collateral which is itself the object of speculation, asset price bubbles can persist, even when a growing share of investors believe that assets are overvalued.

Experience

Instructor	2015–2019
Department of Economics, University of Utah	
Courses taught:	ECON 3200: Money & Banking ECON 3500: International Economics ECON 2010: Principles of Microeconomics
